

12_08 Changes to Prop Conc Curb 8in. x 8in.

Question:

In the design file, I need to change 2'-6" curb and gutter to 8"x12" channelization. I go to the payitem design and computation pull down to access 8"x12" and make the change. When I go back and list or id it, it lists as 8"x18" channelization.

Answer:

The level for the 8"X12" concrete curbs has been changed from "Prop Conc Curb 8in x 18in" to "Prop Conc Curb 8in x 12in".

Note that all previously placed payitems (before today's date) as 8inX12in curbing should be updated or reset to the new level for automatic quantities to work.
